DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: --MULTIPOLE UNIT FOR A COLOR PICTURE TUBE WITH INTEGRATED SPRING ELEMENT--.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the spring element integrated in the stop must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, on line 3 the word "attachable" is indefinite and not positively recited. The information after "attachable" may or may not be a limitation.

A 112 2nd paragraph rejection has been determined for claim 1, as written about above. However, a further evaluation of the claim will be done while interpreting "attachable" as "attached".

Claims 2-9 are rejected for depending from a rejected claim.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 2-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggests a multipole unit for a color picture tube including the combination of all the limitations as set forth in claim 1, and specifically wherein the at least one magnetic ring being attached to the support tube,

Art Unit: 2879

and a spring element is provided between the retaining ring and a stop on the outer circumference of the support tube, the spring element acts in axial direction and is integrated in the stop or the retaining ring could not be found elsewhere in prior art.

Regarding claims 2-9, claims 2-9 are allowed for the reasons given in claim 1, because of their dependency status on claim 1.
